scrubbing machine**

Difficult jobs made easy with the Caddy Clean scrubbing machine

Caddy Clean is a versatile, lightweight scrubbing machine which can be used on almost any surface, making it a popular choice with professionals. Battery operated and compact, it is perfect for cleaning smaller or hard to reach areas where bulky mains-operated machines can't fit.

Its 1.7 litre solution tank (sold separately) and trigger delivers fluid straight to the scrubbing heads, which includes soft microfibre or abrasive pads and bristle heads for tough scrubbing, cleaning and polishing. The telescopic handle reduces bending and stretching, and the handheld attachment can be used on its own for scrubbing on bathroom or kitchen surfaces.

Pads and brushes are easily attached and the heavy-duty battery, which fits onto a belt, gives up to 2½ hours cleaning time. Caddy Clean is suitable for use just about anywhere, with no need to carry multiple tools for different areas. Abrasive pads come in seven colours.

Key features & benefits

Light-weight

Abrasive

Telescopic

High performance

- Versatile - suitable for use in a wide range of tasks from scrubbing to light polishing.
- Telescopic - reaches up to 6' 10" to reach high and low cleaning areas.
- Safer - no need for trailing mains wires.
- Lightweight - easy to carry and reduces strain during use.

What's in the kit?

The kit includes the scrubbing machine, handheld attachment, 12v battery, charger and belt clip, two pad holders, two abrasive and soft pads, two standard and light brushes (solution tank sold separately).

The handheld kit includes the scrubbing machine, handheld attachment, 12v battery, charger and belt clip, two pad holders, two abrasive and soft pads, two standard and light brushes.

User instructions

Use the abrasive scrub pad for tackling tough dirt and grime leaving shiny polished surfaces, and the microfibre pad to pick up dust, dirt and to buff tiled surfaces for a polished finish.

Washing, care & maintenance

Solution tank can be removed for rinsing or cleaning, brush heads and pads can be washed in warm water with ordinary detergent.

Types of surfaces

Wood and stone floors, tiling, enamel surfaces and stainless steel.
