Mi-cloth & Mi-mop disposable microfibre range

Mi-cloth & Mi-mop disposable microfibre range removes 99.99% of germs, including coronaviruses.

Mi-cloth and Mi-mop, a disposable microfibre product that's ideal for use in hygiene critical areas like catering and medical to prevent cross-contamination, is certified to EN 16615* which proves it removes 99.99% of germs, including coronaviruses, from surfaces.

Available in four colours for good hygiene, this cost-effective microfibre cloth can be used for multi-surface, smear-free cleaning, including on stainless steel and glass. Its super soft feel enables it to be used on most surfaces. Low linting, lightweight and food contact safe, Mi-cloth is also highly absorbent and remains strong even when damp.

Available as sheets in a pack or roll, or as a flat mop. Mi-Cloth packs contain 50 cloths, the roll 250 sheets, and Mi-Mops are sold in 50s. The pack sheets are slightly larger than the roll's perforated sheets and the rolls can be used in dispensers, stored and carried around on trolleys or stored on work surfaces.

Key features & benefits

Removes 99.99% of germs

Microfibre Cleaning

No chemicals required

Disposable

- Removes 99.99% of germs, including coronaviruses
- Low linting microfibre
- Single use prevents cross contamination
- Very absorbent
- Minimal water and chemical required
- Remains strong when damp
- Can be used with hypochlorite solutions
- Colour coded

(*EN 16615 has been modified to test the efficacy of wipes in real-life situations, and is tested on a non-porous surface with mechanical action.)

How it's used

While the cloths can be used in many applications it is especially relevant where cross contamination is an issue and there is no access to laundry facilities.

User instructions

Use dry or damp – damp for best results. Can be disposed of after use to prevent cross contamination.
