**Toucan Eco Worktop**

# Toucan Eco Worktop is the greener way to clean smaller workplaces and the home.

Toucan Eco requires water, salt and electricity to produce hypochlorous acid, a powerful disinfectant, along with a low concentration of sodium hypochlorite which, when combined with a pH of around 7.8 to 8.5, acts as a mild cleaning agent.

The solution has a fast contact time and, as its non-toxic and hypoallergenic, it's a safe and eco-friendly way to clean without any COSHH implications. It's great for busy environments which demand a quick and effective cleaning regime, while helping businesses to become more sustainable and save money.

Toucan Eco Worktop makes one litre of multipurpose disinfectant cleaner, which replaces most chemicals and the single-use plastic bottles they are supplied in. To make fill the jug with tap water, normal salt, then activate, which takes five minutes.

- ✓ It's a multipurpose disinfectant cleaner that kills more than 99.99% of germs.
- ✗ It doesn't replace strong degreasers and descalers.

## Key features & benefits

Kills more than 99.99% of germs

Environmentally friendly

Cost effective

Non-toxic & hypoallergenic

- Fast acting and kills more than 99.99% of bacteria and viruses.
- Non-toxic, hypoallergenic, safe on any surface and no need to rinse off.
- Tested to EN 14476, EN 16777, EN 1276 and EN 13697.
- You make the solution yourself so you'll never run out.
- Reduces over 80% of chemical, plastic waste and money.

## What's in the kit?

One litre jug, activation unit, measuring spoon, stirring rod, atomiser spray bottle, adapter and plug, user instructions, and a bottle of salt.

## How it works

The solution is electrochemically activated using a specialised electrolysis cell to break up and recombine the naturally occurring elements of water and salt.

## How to use

Simply spray, wipe or mop any surface, including glass and fabrics. It also works as a deodoriser and you can apply as a mist for disinfecting large areas.

## Proven solution

Certified to EN 14476, EN 16777, EN 1276 and EN 13697, registered as an EU biocide, food safe, non-toxic and hypoallergenic. Contains 99.9% water, hypochlorous acid and sodium hypochlorite at a gentle pH.
