Serious cleaning know-how

Oxygen-Pro air freshness System

Oxygen-Pro is a continuous fresh scent and odour control system that is reliable, effective, safe and eco-friendly.

Oxygen-Pro is the only technology that delivers fragrance into the air continuously, consistently and accurately for the entire duration of the cartridge life, and without the use of aerosols.

This precision oil delivery system is based on a fuel cell technology that is used in the pharmaceutical industry to deliver drugs to patients.

Another great feature of the product is the management and reminder system as it alerts when the cartridge or batteries need replacing.

Oxygen-Pro is the perfect odour control system for any environment and can be programmed to work for 30 days for high intensity, 60 for normal intensity or 90 days for low intensity. The cartridge contains 35ml of pure fragrance oil, which is around seven times more fragrance oil than a standard metered aerosol can.

Key features & benefits

Odour control

Long lasting

Eco-friendly

Innovation

- Continuous fresh scent and odour control system.
- Eliminates odours and releases fragrances.
- Oxy-gen powered fuel cell technology.
- Built in alerts for fragrance and batteries.
- More fragrance oil than a standard metered aerosol can.
- Eco-friendly and doesn't contain CFCs, VOCs or propellants unlike aerosols.

Range of cartridges

Glow, a fresh, juicy black cherries scent, with a hint of almond, plum, vanilla and cinnamon spice, and Spa, a fresh, invigorating, scent

with fragrant lavender and spicy herbs. A third option is Neutra-lox odour eliminator, a low fragrance odour control cartridge designed to remove nasty smells effectively with a hint of lemongrass.

All Oxygen-Pro fragrances contain Neutra-lox, and so unlike other systems that only mask odours, Oxygen-Pro fragrances eliminate bad odours and can cover an area of up to 6000ft³.

Why is it eco-friendly?

Oxygen-Pro is a Carbon Footprint approved product that has been independently assessed and verified for emissions and energy consumption, making it reliable and eco-friendly. Unlike aerosols, it doesn't contain any CFCs, VOCs or propellants, uses less energy than similar aerosol products and you are left with no residual oil at the end of the cartridge life which allows all the cartridge elements to be recycled.

Code	Product	Qty
105001	Dispenser	1
104993	Dispenser	6
104994	Cartridge Glow. Spa. Neutra-lox	6
